DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a drive mechanism of an exercise device, classified in class
 482, subclass 51.
- II. Claims 11-37, drawn to a seat adjustment mechanism of an exercise device, classified in class 248, subclass 407.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as a drive mechanism for other exercise apparatus such as swimming simulating devices that only exercise a user's arms. Furthermore, the seat adjustment mechanism can be used for other devices such as scooters. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the distinct inventions as described above.

Applicant is required to elect a single invention for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the invention that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
